

Molecular pathways underlying lung-brain axis signaling in asthma: relevance for psychopathology and neuroinflammation

Methods

23 adults with mild asthma

Pre and Post SBP-Ag

Allergen provocation activates salience network

Distal effects in brain

Δ emotional reactivity

Allergen provocation promotes eosinophil & inflammatory cell influx

Allergen in lung

BAL: Bronchoalveolar lavage
fMRI: Functional magnetic resonance imaging in response to allergy-related verbal cues
SBP-Ag: Segmented bronchial provocation with allergen
